OBJECTIVE

Full-stack software developer with hands-on experience across web application development and AI-driven automation, seeking a position in a professional organization where I can apply my skills to deliver reliable, scalable solutions while contributing to organizational goals and continuing to grow technically.

SKILLS

- Languages: Java, JavaScript, Python, HTML
- Frontend: React.js, HTML5, CSS
- Backend: Node.js, Express.js
- Databases: MySQL, MongoDB
- AI & Automation: AI Agents, RAG (Retrieval-Augmented Generation), LLM Integration, n8n Workflow Automation
- Tools: Git, Version Control, Basic Networking, MS Excel

EXPERIENCE

Software Developer, Watave Solutions

October 2025 - September 2026

- Developed and maintained full-stack web applications using Node.js, React.js, and RESTful APIs, delivering features end-to-end from database to UI.
- Designed and implemented AI agents and Retrieval-Augmented Generation (RAG) pipelines to enable context-aware, automated responses within business applications.
- Built and deployed workflow automation pipelines using n8n and other automation tools to streamline repetitive processes and improve operational efficiency.
- Collaborated with cross-functional teams to integrate AI-driven features into existing full-stack products.

Software Engineer, Mphasis

September 2023 - March 2024

- Gained hands-on experience with .NET technologies and SQL Server while contributing to backend development tasks.
- Supported database integration and backend logic for enterprise applications as part of a collaborative development team.

PROJECTS

Task & Project Management Platform | MERN Stack - React.js, Node.js, Express, MongoDB

Full-stack task and project management application with JWT and OAuth (Google/GitHub/Facebook) authentication, role-based access control, Kanban-style drag-and-drop boards, automated email notifications, and rate-limited secure APIs.

AI-Powered Conversational Voice Agent | Node.js, LLM Integration, Speech-to-Text/Text-to-Speech

Voice-agent platform simulating real-time interview, sales, and customer-support conversations using LLM-driven persona generation, dynamic scenario analysis, reusable voice profiles, and full conversation transcript logging.

RAG-Based Document Q&A Application | Node.js, Express, React, LLM Integration, Vector Embeddings

Full-stack Retrieval-Augmented Generation (RAG) application enabling users to upload documents and receive context-aware, LLM-generated answers, using vector embeddings and semantic search for accurate, source-grounded retrieval.

QR-Code Based Event Management System | MySQL

Event management system streamlining registration, ticket distribution, and attendee verification via QR codes, backed by a MySQL database for attendee and activity analytics.

EDUCATION

Master of Computer Applications - RV College of Engineering, Bangalore

2020 - 2022

Bachelor of Computer Applications - Gogte College of Commerce, Belgaum

2017 - 2020

CGPA: 8.2

EXTRA-CURRICULAR & INTERESTS

Paper presentation on "Movie Recommendation System Using Machine Learning Algorithms"; completed 4 exams in Tabla. Interests: Football, Cricket, Chess, and Travelling.
